

EBUSCO 2.2

MADE TO MOVE PEOPLE

EBUSCO®

**WE ALL SHARE
ONE DESTINATION:
OUR FUTURE**

SILENT & CLEAN CITIES

Ebusco's work is all about people. It is our goal to contribute to a better living environment by enabling reliable, sustainable, emission-free and affordable public transport. We ❤️ the transition to sustainable transport!

Our electric buses ensure clean and quiet cities. This is a top priority around the world and we are pleased to make our modest contribution to it!

per bus, per kilometre

But why would you acquire an electric city or regional bus? For many people the transition from diesel to electric is by no means obvious or easy. We can imagine that you have many questions and doubts.

We'll be happy to help you with this transition. We embarked upon the electric bus adventure back in 2010, and so we already have many years of experience that we would like to share with you. Since the company's creation in 2012 we have gained extensive experience by supplying more than 150 buses to 15 European cities.

In January 2020 our buses had covered 6 million electrically powered kilometres. Our city and regional buses have normal timetables and can therefore easily cover 350 kilometres a day on a single battery charge.

The goal of Ebusco is to make clean, silent and emission-free public transport available to everyone.

Ebusco®, join our mission.

WHY EBUSCO 2.2

100% Electric

Fully electric buses

Zero Emission

We love clean air

CO² & NO_x reduction

We reduce CO² and NO_x

Long range

At least 350 km on one charge

Depot charging

Our buses are perfect for depot charging

Battery warranty

We offer 8 years battery warranty

NO DOUBT, ZERO EMISSION.

Zero emission is no longer a dream for the future. Fully electrically buses from Ebusco® make reduced emissions a conscious choice.

NO DOUBT, NO NOISE.

The city is full of noises. Pleasant, but also annoying and dominant. Ebusco® electric buses give priority to silence.

NO DOUBT, 350 KM RANGE.

With a range of at least 350 kilometers, the Ebusco® bus runs from early morning to late evening. There is no need for additional charging.

NO DOUBT, 90 PAX.

Ebusco® does not make any concessions in terms of quality and capacity. Our electric buses transport 90 people without problems.

DRIVER & PASSENGER COMFORT

BUS DRIVER

- ✓ **Comfortable workplace**
- ✓ **Luxurious driver's seat**
completely ergonomically adjustable
- ✓ **Smooth ride**
no exhaust emissions and very little noise
- ✓ **Safe driving**
a stable bus, with good day- and night-time visibility and no blind spots thanks to cameras

Your dashboard helps you with a wealth of digital, real-time information
- ✓ **Training on the job**

BUS DRIVER EXPERIENCE VIDEO

PASSENGER

- ✓ **Comfortable and luxurious travel**
- ✓ **USB ports available throughout the bus**
- ✓ **Clean air**
- ✓ **Less noise**
- ✓ **Airco**
- ✓ **WiFi**

EUROPEAN QUALITY

To ensure the quality of our electric buses, we design, develop and assemble our buses ourselves in Deurne, the Netherlands. Practically all parts of our Ebusco 2.2 buses come from European A-grade suppliers.

Our suppliers and partners are vital to our continued success by delivering necessary products and services for our business.

- City & Intercity
- as from October 2019 and Q2 2020

CHARGING SOLUTIONS

Operators would prefer to make as few changes as possible to the existing infrastructure in the transition from diesel to electric buses. We fully support this. Right from its creation in 2010 Ebusco has been a strong promoter of depot charging.

DEPOT CHARGING

Our batteries are of such high quality that daytime top-up opportunity charging should not be necessary. Overnight charging in depots is sufficient, and this also places less demand on the grid in daytime. Needless to say this makes a big difference in costs and it is also better for the battery, as it extends its useful life. Furthermore there is no need to install large charging posts in cities.

OPTIONAL: OPPORTUNITY CHARGING

- Inverted
- Pantograph up

EBUSCO® LIVE FULL CONTROL OF YOUR FLEET

Ebusco Live is the real-time monitoring system for all buses. It shows among other things the battery status and the average efficiency. These data are essential for bodies granting concessions and for operators in order to optimise the operation of electric buses as regards range, efficiency, emission reduction and performance. Drivers can be educated with the data gathered while driving and routes can be adjusted following detailed review of the current practical range. The insights provided into emission reduction can be valuable for both political and public perceptions of zero emission results through the use of electric buses.

Ebusco offers the Ebusco® Live online monitoring system on all its buses

PROVEN TECHNOLOGY

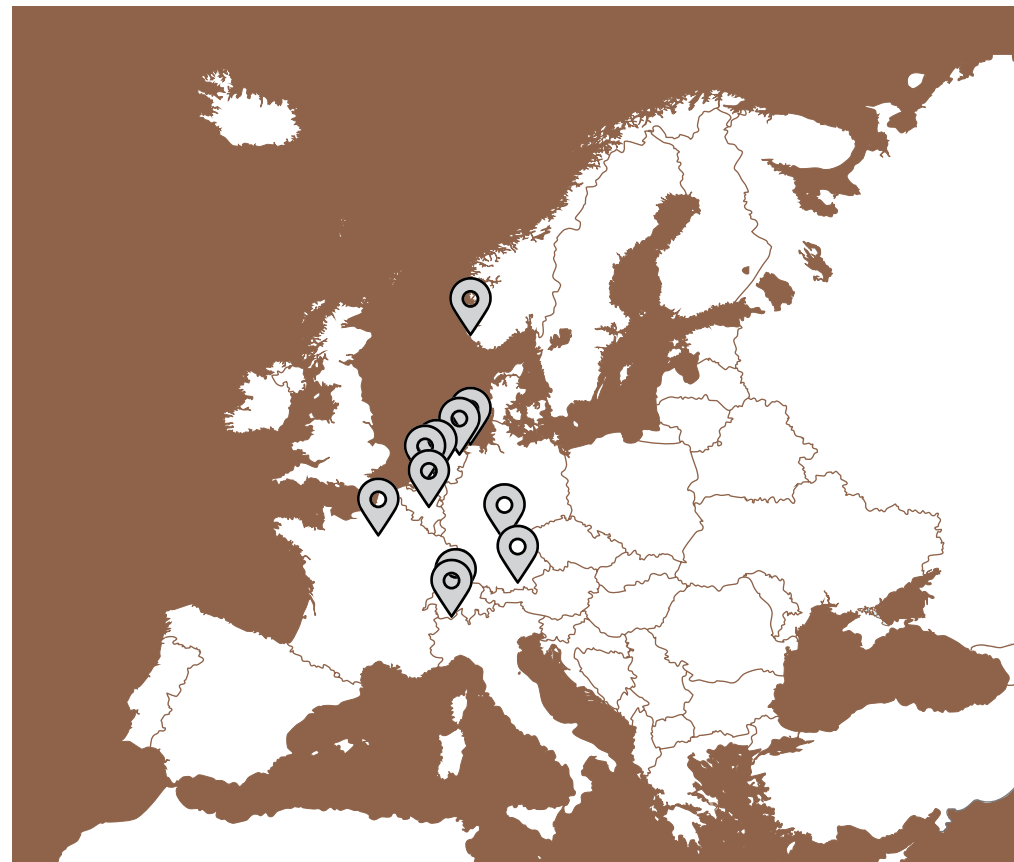

By choosing our buses, you opt for uncompromising electric public transport. From early morning to evening, every Ebusco bus can run full-fledged services, on every route. This offers you ultimate flexibility to use your resources and people in the best possible way.

The powerful battery also has advantages for the city. Additional charging stations are not needed and routes can be changed whenever necessary, for instance during events. The extremely low energy consumption ensures that your drivers can drive to the depot with sufficient residual charge after their service is completed, without any worries.

CASE STUDIES ACROSS EUROPE

Ebusco brings the crucial energy transition a step closer to reality. It will also ensure that you can really get to grips with the EU's emission targets for public, freight and passenger transport in urban environments. We are already tackling these important challenges with the deployment of our electrically powered public transport buses. We do this together with leading cities such as Paris, Munich, Utrecht and 12 other cities. When is it your city's turn?
