FOR **HAARLEM**

A BETTER LIVING ENVIRONMENT

CLEAN, QUIET, SAFE AND HEALTHY

Our Ebusco 2.2 buses contribute to a better, healthier, living environment by offering reliable, sustainable and emission-free public transport.

15 million kilos
CO₂ savings per year

1 kg CO₂ reduction per kilometer driven

No emission of CO₂, NO_x or particulates

MAXIMUM SAFETY

CAMERAS IN STEAD OF MIRRORS

Transdev The Netherlands has chosen for the mirror- and cornereye camera system! All buses for the regions Amsterdam and Haarlem will get cameras instead of mirrors.

The cameras greatly reduce the blind spot of the bus. This gives the driver a better overview of his surroundings. By replacing the mirrors the bus also becomes less wide. This contributes to extra driving comfort for the driver, more safety and damage reduction.

Mirror- and cornereye cameras

For maximum safety

RANGE

350 KM ON ONE CHARGE

LFP BATTERY TECHNOLOGY

SAFE AND POWERFUL
LFP BATTERY (363 kWh)

WEIGHT

ONLY 12.800 KILO

CAMERAS

IN STEAD OF MIRRORS

LUXE
